PROFILE SUMMARY

I am a motivated Computer Science graduate with a BSc (Hons) in Computer Science from University of Staffordshire, awarded Second Class Honours (First Division). I have gained practical industry experience as a Software Engineer Trainee, working remotely in a professional development environment. With a strong foundation in software development and a passion for technology and innovation, I am eager to contribute to real-world projects and continue growing as an IT professional. I am particularly interested in building scalable solutions, improving user experiences, and collaborating within dynamic, forward-thinking teams.

- **Technologies used:** HTML, CSS

5. SkillBridge Web Application (Final Year Project)

2025 - 2026

Staffordshire university

- **Description:** A research-driven final year project focused on developing a web-based skills-based volunteering platform that connects corporate employees with nonprofit organizations, aligning Corporate Social Responsibility (CSR) initiatives with Human Resource (HR) development.
- Led the design and development of a user-centered platform enabling structured volunteer-task matching based on skills, availability, and experience.
- Designed and implemented a rule-based matching engine to ensure transparency and improve task-skill alignment.
- Developed key features including volunteer dashboards, task management, gamification (badges/leaderboards), and HR analytics dashboards.
- Applied Agile methodology with iterative prototyping, usability testing, and continuous feedback integration.
- Enhanced skills in full-stack development, system design, analytical thinking, research, and problem-solving.
- **Technologies used:** React.js, Laravel / Node.js, MySQL, HTML, CSS, JavaScript

6. Procurio General Trading Website

Procurio General Trading LLC (Dubai, UAE)

- **Description:** Developed a responsive corporate website for a hospitality supplier, showcasing hotel equipment and operating supplies with a modern and user-friendly design.
- Designed and customized pages using WordPress and Elementor, ensuring a visually appealing and fully responsive layout across devices.
- Implemented key sections including About, Partner Showcase, Contact Form, and Newsletter to enhance user engagement and business visibility.
- Optimized site performance, navigation, and content structure for improved user experience and accessibility.
- Collaborated on content structuring to effectively present products and services aligned with business goals.
- **Technologies used:** WordPress, Elementor, HTML, CSS
- **Live URL:** <https://procurio-me.com/>

7. Lotus n Loom Website

Lotus n Loom (Online Brand)

- **Description:** Developed a modern and elegant website to showcase handcrafted products, focusing on a clean user interface and a seamless browsing experience for an online brand presence.
- Designed and built responsive pages using WordPress and Elementor, ensuring consistency across desktop and mobile devices.
- Created visually engaging layouts to highlight products and brand identity, improving overall user engagement.
- Implemented smooth navigation and optimized page structure for enhanced usability and accessibility.
- Integrated essential website features including product showcases and contact functionality to support customer interaction.
- **Technologies used:** WordPress, WooCommerce, Elementor, HTML, CSS
- **Live URL:** <https://lotusnloom.com/>

8. Trypod Appointment Booking Platform

Trypod (Online Platform)

- **Description:** Developed a customer-friendly appointment booking system enabling users to browse services, apply filters, and manage bookings through an intuitive interface.
- Built a dynamic and responsive frontend using React and Tailwind CSS, ensuring a smooth and engaging user experience across devices.
- Developed backend functionalities with Laravel, including service management, booking workflows, and data handling.
- Implemented key features such as service filtering, service cart system, and dedicated store pages to streamline the booking process.
- Optimized application performance and usability through efficient state management and clean UI design.
- **Technologies used:** React.js, Laravel, Tailwind CSS, HTML, CSS, JavaScript
- **Live URL:** <https://trypod.lk/>
